**Yemi Chainani**

## What is your role?

I am one of the Science Technicians.

## How long have you worked here?

I started working at Beaconsfield High about two years ago, in 2022.

## Where are you based?

I have little lab in the Science Block.

## Best thing about working at Becky High?

It has to be the science team who are so much fun to work with!

## Life before Becky High!

I studied biochemistry at the University of Essex and when I graduated, I worked in a private clinic during which I discovered I did not enjoy standing all day! I then went to work in a bank, but I made the decision to stop working when I realised all my income was going on childcare! As my family grew, I made the decision to become a full-time mum until my youngest went into Year 5, at which pointed I decided working in a school would allow me to earn money and still enjoy my babies. The rest is history!

“

When I left the bank, I learnt how to make beaded jewellery and started a business making bespoke beaded and sterling jewellery.
