

60 SECONDS with

MS LUCY BARKER

Head of Year 10 and a PE Teacher

What made you decide to be a teacher?

I struggled at school and it was only during my teacher training year that I was diagnosed with dyslexia and high visual stress. It was the practical subjects like PE, art, science and D&T that kept me motivated. I also love sport and the theory element, hence why I did my degree in sports science and coaching.

If you won the lottery, what would you do with the money?

Buy a new house with a walk in wardrobe, gym, swimming pool, hot tub, and a personal chef. I would also take all my friends and family on the holiday of a lifetime!

What was the last thing you looked up online?

AQA trampolining videos for moderation, however I currently have a number of tabs open including Oasis for some window shopping.

If you had a time machine, would you choose to go to the future or the past, and why?

I've always been fascinated by the Romans, in the summer, before Covid, I was lucky enough to spend three weeks traveling around Italy which included a trip to Pompeii and Mount Vesuvius! However, I would also like a glimpse into the future to see what it brings.

If you had one day to do anything, what would you do?

I would love a spa day, a real pamper sesh with all the treatments!

Why did you choose to work at Becky High?

The students here are amazing, especially Year 10 😊. I love how there is so much emphasis on sport and so many opportunities both in and out of PE. I have never known a state school to offer so much, there really is something here for every student!
