

EMILY CHARLES-ALTY

PHYSICS TEACHER

WHAT MADE YOU WANT TO BE A TEACHER?

I want to share my passion for physics with pupils, supporting them to see the fun and beauty in physics and maybe even inspire a few future scientists along the way.

Peace at Last
Jill Murphy

FAVOURITE SMELL?

The earthy smell just after it rains which is known as petrichor.

FAV CHILDHOOD BOOK?

WHO WHATSAPP'D YOU LAST AND WHY?

My husband explaining to me that one of my cats (Helix) had managed to get stuck behind the oven and had to be enticed out with lots of treats and some unexpected DIY.

I can only pick one?! It would probably be "Peace at Last" by Jill Murphy as it was the first book I ever read!

WHY DID YOU CHOOSE BECKY HIGH?

The wonderful pupils I have the privilege of working with every day. They make this job so enjoyable, and I am regularly made to rethink an area of science from a different perspective through insightful and often hilarious conversations.

IF YOU COULD, WHAT WOULD YOU CHANGE YOUR NAME TO?

It would have to be an astronomy-based name, so maybe my favourite constellation - Cassiopea.
