

MR PETERSON

MATHS TEACHER

WHAT MADE YOU WANT TO BE A TEACHER?

I loved the idea that I could continue to work with mathematics in my profession, and I enjoy helping people to understand something that they may have previously struggled with. Also, the Team Principal position at the Ferrari F1 team was taken!

WHAT IS THE LAST GIFT YOU GAVE SOMEONE?

A meat/bread cutting machine to my dad, who had been struggling to cut even slices.

STRANGEST QUESTION / REQUEST YOU'VE HAD AS A TEACHER?

What is an underrated salad dressing in your opinion?

LAST BOOK/ PODCAST

As a very keen darts fan, I listen to various podcasts such as 'Tops and Tales', where people in the industry share interesting stories and quirks of the profession. I have attended some events (fancy dress is optional!) and met darts players such as Nathan Aspinall and Michael Van Gerwen.

BIGGEST PHOBIA?

Trypophobia - an aversion to the sight of repetitive patterns or clusters of small holes or bumps.

FAVOURITE WORD?

Discombobulate.

WHY DID YOU CHOOSE BELKY HIGH?

At my interview I got the impression that the teachers, staff and students were all very friendly, which even after a short time being here, I can see that they are!
